According to CNN Business, "*Barnes & Noble attributed the decline to a drop in store traffic. Online sales also dropped 14.3% because of fewer promotions, including in Barnes & Noble's Nook tablet business*". As time goes, readers don't hold so much confidence on Barnes & Noble's business, so does the Nook eBook business. Actually, Barnes & Noble is the first company who reduces the download options among the major eBook vendors. Now, it is very hard for readers to download the Nook books to their computers because they have discontinued the Nook for PC/Mac and web downloading options. I know many people have consumed ebooks in this store for a very long time. This step is another way to push away the customers who want to purchase ebooks. In my aspect, this action will take some responsibility for the decline of Barnes & Noble's revenue. To address Barnes & Noble's wrong action, I will share 3 different ways to download Nook books.
