

audiobook and one credit to buy another audiobook. That means you can get two free audiobooks without any cost. After the 30 days, the membership is 14.95\$ per month. You can get one credit per month for buying audiobooks, plus 30% off to buy any audiobook. As we all know that audiobook is very expensive, 30% off can save you a lot of money. Even more, if you do not like the purchased book, you can exchange it for another one without any other cost.

3, Whispersync feature is the most attractive feature for me. You can switch from reading to listening or listening to reading a book. It will remember your stop place at both ebook and audiobook.

4, Audible is very easy to use. You can purchase the audiobook from your Audible account or amazon account. Then download it to your computer or device to listen to the audiobook.

As a coin has two sides, the Audible also has disadvantages. Compared with other subscription services, its membership is too expensive. Its membership is the highest among the top 5 websites. Another drawback of Audible is all downloaded audible books are with DRM protected which means they only can be played on certain players and devices. This is frustrating. Anyway, you can follow [the official guide to convert Audible to MP3](#), and then listen to the audible audiobooks on any devices.

## Downpour.com

The image shows the top section of the Downpour.com website. At the top, there is a navigation bar with the logo 'downpour' (a green arrow pointing down) and links for 'Browse', 'Membership', 'Sales', and 'Formats'. A search icon and the letter 'S' are visible on the right. Below the navigation bar is a large promotional banner. On the left side of the banner is a photograph of a woman with glasses smiling and listening to music through earbuds. On the right side, the text reads 'Save up to 70% with a membership' in a large, bold font. Below this text is a green button with the text 'Learn More'. At the bottom right of the banner, it says 'Only \$12.99/month • Cancel anytime'. There are also four small circles (three black, one blue) indicating a carousel of slides.

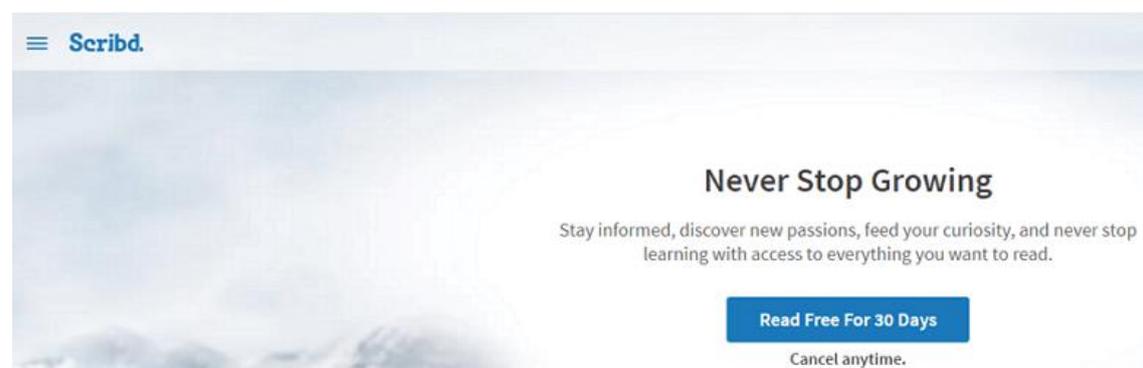

If you love audiobooks but hate DRM, I suggest you have a look at Downpour. It will not let you down. The same as Audible, Downpour sell audiobooks and have subscription service, but the biggest difference is all audiobooks from Downpour are without DRM. When you download the audiobook from this

site, you can listen to it on any device or player, and keep it in your account forever. Beside the DRM thing, there are also other advantages of this subscription service.

- 1, The membership is 12.99\$ per month. You can get one credit every month. Members can purchase the audiobooks with the credit and download it. Members also can purchase multiple credits at the price of 12.99\$ for each. The expire date for credit is 12months from the date you get it into your account. It allows you have 12 credits in total.
- 2, It saves you up to 70% off the retailing price if you own the membership.

Anyway, we have to admit that Downpour is not as famous or well-known as Audible. The catalog is smaller than Audible and only with 60000 audiobooks for your choice. Sometime people will complain that can not find the book they want.

Another giant in audiobook industry is Audiobook.com which has a library of more than 100,000 audiobooks, covering romance, thrillers, young adult, fictions, business, and bios. It also provides audiobook subscription service for \$14.95 per month. During the subscription, you can get one audiobook credit per month and save 75% off anything else you want to purchase. - 3, You are also allowed to listening to the audiobook while streaming this book with an internet connection.

Anyway, we have to admit the Audiobook.com subscription service price is the same as Audible but with fewer audiobook titles. Audiobooks.com currently offers downloadable files to iOS and Android devices only.
